

# UMBC COEIT Engineering and Computer Science Advising Project

At University of Maryland, Baltimore County (UMBC), students and advisors are required to schedule an advising appointment to aid the student in registering for classes for the upcoming semester. This project provides a website for both users to go through this process. The appointment types available are individual and group appointments. The advisors can set up appointments, as well as change their appointment times. Then, the student can sign-up for an appointment to their liking, as well as change their appointment.

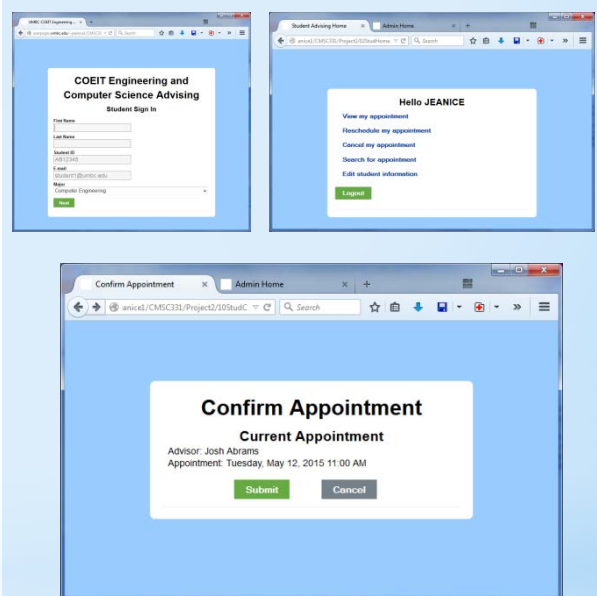

## ADMIN
